AMENDMENTS TO THE CLAIM

Listing of Claims

The following listing of claims replaces all previous listings of claims.

1. (Original) An acupuncture needle container and dispenser to store and dispense a plurality

of acupuncture needles, comprising:

a transparent top cover piece,

an opaque colored bottom piece with a distal end, a proximal end and a middle

portion, said transparent top cover piece fits over the opaque colored bottom piece and forms a

semi-oval needle reservoir at the distal end, a cylindrical inserter at the proximal end and a

channel formed between the semi-oval needle reservoir and the cylindrical inserter to allow for

an individual channeled movement of the plurality of acupuncture needles from the semi-oval

needle reservoir through the formed channel and into the cylindrical inserter;

an insertion tube within said cylindrical inserter with a longitudinal slit to

receive an individual acupuncture needle from the plurality of needles moving through the

channel;

a plunger that fits into the insertion tube and pushes the acquired individual

acupuncture needle through the cylindrical inserter, said plunger having a protruding twisting

handle that has indicia coinciding with the position of the longitudinal slit on the insertion tube;

and

said plunger pushes the acquired individual acupuncture needle from the

cylindrical inserter into an extrusion guide tube for use by a user.

2. (Original) The acupuncture needle container and dispenser according to claim 1, wherein the

channel is provided with individual grooves that can hold a sequential series of individual

acupuncture needles from the plurality of acupuncture needles.

3. (Original) The acupuncture needle container and dispenser according to claim 1, wherein the

individual channeled movement of the plurality of acupuncture needles is produced by tilting

and shaking the acupuncture needle container and dispenser.

4. (Original) The acupuncture needle container and dispenser according to claim 1, wherein the

longitudinal slit is juxtaposed to an individual acupuncture needle moving through the channel

and into the insertion tube.
